

Examine world-class ore deposits

Investigate porphyry, epithermal, VMS, skarn style mineralization

Gain an understanding of the use of various exploration techniques and tools for finding mineralization

geological mapping techniques geochemical analysis ground geophysical surveys drilling operations

metal mineralization in oxide

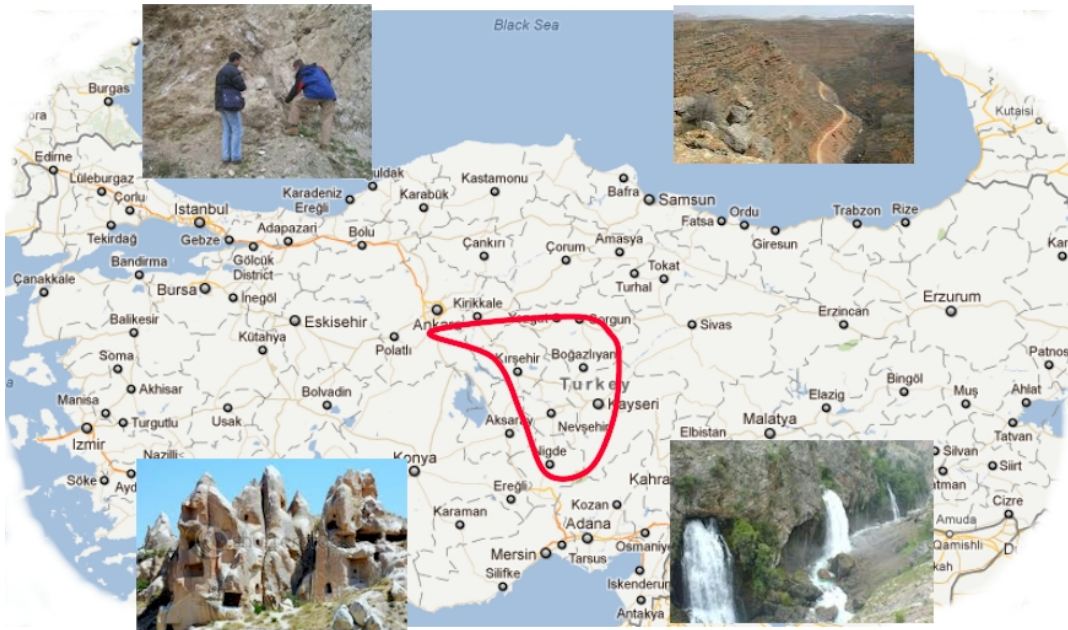

leached

supergene enrichment zones

ORE DEPOSITS FIELD TRIP

Central Anatolia, Turkey

June 17 to June 24, 2012

1/2 day Geology of Central Anatolia Turkey shortcourse | Çelebi Fe-Skarn | Gümüşler Sb-Hg-W-Au | Madsan Sb-Hg | Yahyalı Fe-skarn | Kesikköprü Fe-skarn | Kaman F-Mo | Esendemirtepe Fe-Cu-skarn | Zamantı Pb-Zn | Demirtepe sedimentary Fe | Keskin Pb-Zn / Hüseyin beyobasi Mo | Inlice Au | Attepe Fe-skarn | salt & gypsum deposits & salt lake viewings

Optional: Cappadocia Tour, some Ankara sights, Turkish bath, Dervish show

Deposits Tour: 8 full days (7 nights) \$2500 CAD | Deposits with Optional tour: 13 full days (12 nights) \$3700 CAD (Travel to Ankara and from Kayseri is extra)
